

Project Design Phase-II

Technology Stack (Architecture & Stack)

Date	16 October 2022
Team ID	PNT2022TMID45189
Project Name	Project – Industry-Specific intelligent fire management system
Maximum Marks	4 Marks

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1&table2

Guidelines:

1. Include all the processes(As an application logic/Technology Block)
2. Provide infrastructural demarcation(Local /Cloud)
3. Indicate external interfaces(third party API's etc.)
4. Indicate Data Storage components/services
5. Indicate interface to machine learning models(if applicable)

Table-1: Components &Technologies:

S.No	Component	Description	Technology
1.	User Interface	Web UI, Node-RED, MIT app	IBM IoT Platform, IBM Node red, IBM Cloud
2.	ApplicationLogic-1	Create Ibm Watson IoT platform and create node-redservice	Ibm Watson,ibm cloudant service, ibm node-red
3.	ApplicationLogic-2	Develop python script to publish and subscribe to IBM IoT Platform	python
4.	ApplicationLogic-3	Build a web application using node-redservice	IBM Node-red
5.	Database	Data Type, Configurations etc.	MySQL
6.	Cloud Database	Database Service on Cloud	IBMDB2,IBMCloudant
7.	File Storage	Developing mobile application to store and receive the sensors information and to react accordingly	WebUI,python
8.	ExternalAPI-1	Using this IBM fire management API we can track the temperature of the incident place and where the fire had been attacked.	IBM fire management API
9.	ExternalAPI-2	Using this IBM Sensors it detects the fire, gas leaks , temperature and provides the activation of sprinklers to web UI	IBM Sensors
10.	Machine Learning Model	Using this we can derive the object recognition model	Object Recognition Model
11.	Infrastructure(Server/Cloud)	Application Deployment on Local System / Cloud Server Configuration	IBM cloudant, IBM IoT Platform

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology
1.	Open-Source Frameworks	MIT app Inventor	MIT License
2.	Security Implementations	IBM Services	Encryptions, IBM Controls
3.	Scalable Architecture	sensor-IoT Cloud based architecture	Cloud computing and AI
4.	Availability	Mobile, laptop, desktop	MIT app
5.	Performance	Detects the Fire, gas leak, temperature	sensors
